

STENT DELIVERY SYSTEM LOADING TOOL

ABSTRACT OF THE DISCLOSURE

1055336-012307

A removable loading tool for use with a catheter assembly wherein the
5 loading tool comprises a body which defines a substantially hollow chamber. The
substantially hollow chamber has a first portion and a second portion. The first portion
has a first diameter sized to contain at least a portion of the catheter assembly having a
stent mounted thereon. The second portion has a second diameter less than that of the
first diameter. The body constructed and arranged to protect the at least a portion of the
10 catheter assembly and the stent from undesired contact or damage during loading of a
guide wire into the catheter assembly.
